**Subject:** Correction, and a question

Correction: In my previous email I advised that a redline/strikeout of the EPS document would follow soon. I was wrong - we won't have a RLSO version of that document, because it has changed so fundamentally from the previous EPS document. (Most of the document would be redlined, which would not be informative.)

Question: I will be express mailing the hard copy of the transmittal letter, and the hard copies of all the documents, to Ann. I can make a second set of hard copies and mail them to John if desired -- please let me know if you'd like me to do this, or if it is unnecessary as you have the electronic versions. Also, the documents will of course be posted on the web site. They should be up by shortly after 11 AM.

- Walter
